SOLUTIONS NORTH OF THE BORDER

We are pleased to now count the Tilbury District Historical Society of Ontario, Canada as one of our success stories working with and providing their team with much needed archival solutions.

We're continuing our partnership with Tilbury consulting them on Phase II of their digitization project. This step will entail selecting production level scanners for archivist use and a cloud strategy for public access.

Nexus Imaging is committed to helping preserve history one collection at a time.

WELCOME TO THE NEXUS IMAGING SOLUTIONS NEWSLETTER!

We are pleased to bring to you the 1st installment of our newsletter keeping you apprised of pertinent company news, industry trends and helpful hints as you strive to find solutions for your preservation needs. Feel free to reach out to us regarding any of our highlighted topics or other related questions.

NEW AUDIO AND VIDEO CONVERSION SERVICES

Nexus is now offering digital conversion services for your movie film, video tape and audio tape collections. Whether it is in fairly current media forms or old and outdated types like U-matic and Beta, we handle it all. Further, your precious memories are processed stateside and not shipped overseas as is commonly done. Please click [here](#) to analyze your current A/V collection.

Let's finish the year strong! 2017 is flying by and we are well positioned to assist you with opportunities for a productive close.

*Whether you are taking advantage of the **Section 179 tax deduction** for equipment placed in service during 2017 or want to complete an imaging project before 2018, we're here to help.*

IS IT TIME TO FINALLY PROTECT AND PRESERVE YOUR HISTORICAL COLLECTION?

As time passes and collections and back files continue to age, maintaining the integrity of those irreplaceable items is always a concern. Whether your plan is to purchase production equipment and digitize your collection in-house or have a trusted and experienced service bureau professionally manage your project, we have the perfect solution to fit your organization's needs.

THE ULTIMATE PATRON SCANNING SOLUTION

Introducing the new Crowley Overhead Document Scanning system (ODS). Designed for walk-up users (students, patrons, researchers, others), the Crowley ODS Scanner offers simplicity where needed and sophistication where demanded. It features a straightforward interface which facilitates usability for all experience levels. Also, the 8mm wide-angle lens and cool LED lighting ensure high quality scans without the need for warm up time.

***Ask us about our year-end ODS purchase promotion or our very budget-friendly leasing terms.**

FEATURED WHITEPAPER

Overwhelmed by your current information management system? Are you in control of your corporate data growth? At Nexus Imaging, we offer the full suite of **ECM** solutions to simplify your office functions and create a more productive and efficient work environment.
