WHAT IS BUSINESS CONTINUITY?

“Business continuity is the continuous and comprehensive planned response to and recovery from disruptions caused by disasters. According to the [Disaster Recovery Institute \(DRI\)](#), a business continuity plan includes a collection of procedures and information that is developed, compiled, and maintained in readiness for use in an incident to enable an organization to continue to deliver its critical products and services at an acceptable predefined level.

Business continuity plans typically address an entity’s ability to restore critical functions. These include serving customers, supporting employees and sustaining core functions, such as accounting, IT and technology support.

The COVID-19 pandemic has left a profound impact on the public health, social infrastructure and the global economy. It undoubtedly has shaken up many businesses’ technology decisions and strategies for the foreseeable future”.
